NailItOrFailIt: VFX and SFX Audit

Which player actions have no visual or sound effect yet. Singleplayer, based on the project on the Develop branch, 4 November 2026.

67	57	35	5
actions checked	need sound work (20 are P1)	have no visual effect	use a placeholder visual

How to read this

- **Section 1** is the full matrix for the team.
- **Section 2** is the sound list for the sound artist, and can be sent on its own.
- **Section 3** is the missing visual effects, each with a suggested effect from our plugins.
- **Section 4** lists wiring bugs and existing clips nobody uses.

Priority. **P1** core gameplay feedback, the game feels broken without it. **P2** adds a lot of polish. P3 nice to have, or only needed by the optional rain mutator.

What this audit does and does not cover

- Checked from the wiring in prefabs and in Level_05, plus the gameplay scripts. No clip was listened to.
- Other levels are built by the same tool and share these prefabs. Their scene overrides were not checked one by one.
- Sound or particles triggered from **animation events** were not checked, so a few animation-only actions may have more than listed.
- Suggested effects are matched by name from Cartoon FX Remaster and StylizedWaterEffects and have not been previewed in the game.
- Multiplayer has its own code paths and is out of scope.

2. Sound list for the sound artist

The tone is a light, comedic construction game with cartoon visuals, so sounds should be punchy and a bit exaggerated. Actions repeated often need variations so they do not get tiring. The **Existing clip** column lists an unassigned file already in the project at `Assets/Art/SFX`. Please review it and either approve or replace it. If a clip was AI-generated, tell us, because it would need a Generative AI disclosure.

Construction

#	Sound needed	Plays when	Brief	Format	Existing clip	Pri
4	**Place a tile on a floor slot**	Tile placed on a blueprint	Tile set down, solid thunk.	One-shot, 2 variations	constructon.mp3	**P1**
5	**Nail a tile down**	Each press while building a tile	Hammer on nail, satisfying and quick. Plays repeatedly, so it needs variation.	One-shot, 3-4 variations	repair(loop).mp3	**P1**
6	**Tile finished**	The tile's build bar reaches 100%	Short positive confirmation.	One-shot	-	**P1**
7	**Room finished**	All tiles of a room done, walls appear	Celebration stinger, walls going up. Currency gain sound already plays on top.	One-shot, 1-2 s	-	**P1**
1	**Take material from a pile**	Player presses E on a wood, brick, cement or glass pile	Material being picked up. One variation per material if possible (wood knock, brick scrape, cement bag, glass clink).	One-shot, 3 variations	-	**P2**
2	**Pick up an item from the ground**	Player grabs a dropped item	Short, soft grab.	One-shot, 2-3 variations	-	**P2**
3	**Drop an item**	Player drops an item, or loses it when slipping	Object hits the ground, ideally by material.	One-shot, 3 variations	throw.mp3	P3

Assets/sounds

Nothing in this folder is used. It holds ArcadeGameBGM music and a ShootingSound pack (lasers, cannons, magic). It does not fit the game, so it can probably be removed from the project.

Licensing and AI

Before release, confirm the source of every clip kept from this list. The audit only checks whether a file is used, not where it came from.
